

Tool Summary:

-- Quizbliz-- in cooperation with Platform3L

Which values are generated?

For beneficiaries:

- Fast learning ramp up to develop good knowledge base within short time through quizzing to a large number of learners simultaneously - learning in small nuggets and independent of a place, mobile supported.
- Questions and quizzing categories can be created easily to serve any purpose.

For projects:

- Thanks to the cloud based software ramp up for any worldwide location can be provided in no time. Only access to WLAN is required.

How it works?

- Quizbliz is a web based smart learning platform which can be easily customized for any learning purpose. E.g fast ramp up for any type of onboarding, vocational training, fast adaptation of company processes in case of franchise organisations (e.g. retail or hospitality). For hospitality we can provide already a huge amount of questions. We can support any language, even the quizzing between people with different languages will be supported soon.
- We can set up Quizbliz within a couple of days. We provide you with a template for easy generation of questions. Once uploaded, we can easily start operation without a physical setup in the place of the learning measure.

What is needed?:

Access to WLAN and questions for the quiz.
