

# CEFE GLOBAL IMPACT STUDY 2019

# CEFE AT A GLANCE

## Open

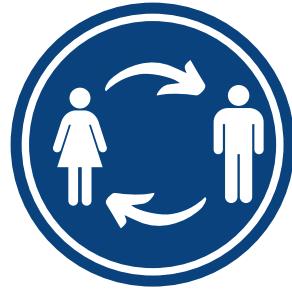

CEFE is a flexible and universal method in entrepreneurship and SME promotion. Once you have completed a CEFE Training of Trainers, you can modify the method, adapt it to specific contexts and use it freely.

## Efficient

Global Evaluation 1994: On Average 4.5 jobs per participant were created after CEFE training.  
Vietnam 2003: On Average 20 jobs per start-up were created after CEFE training.  
Rwanda 2012: 1043 Beneficiaries participated in CEFE training. 931 additional jobs were created afterwards.

## Dynamic

CEFE training is a broad term, used for different tools, objectives, duration and target groups. The common denominator is the promotion of entrepreneurial competencies by using highly participative methods. CEFE modules are usually developed by actors around the globe.

## Far - reaching

Starting in Nepal in 1983, CEFE has been introduced into 140 countries. There are active CEFE advisors in more than 75 countries. Practically speaking, there are beneficiaries attending a CEFE training session, all the time and every day.

# THIS SURVEY

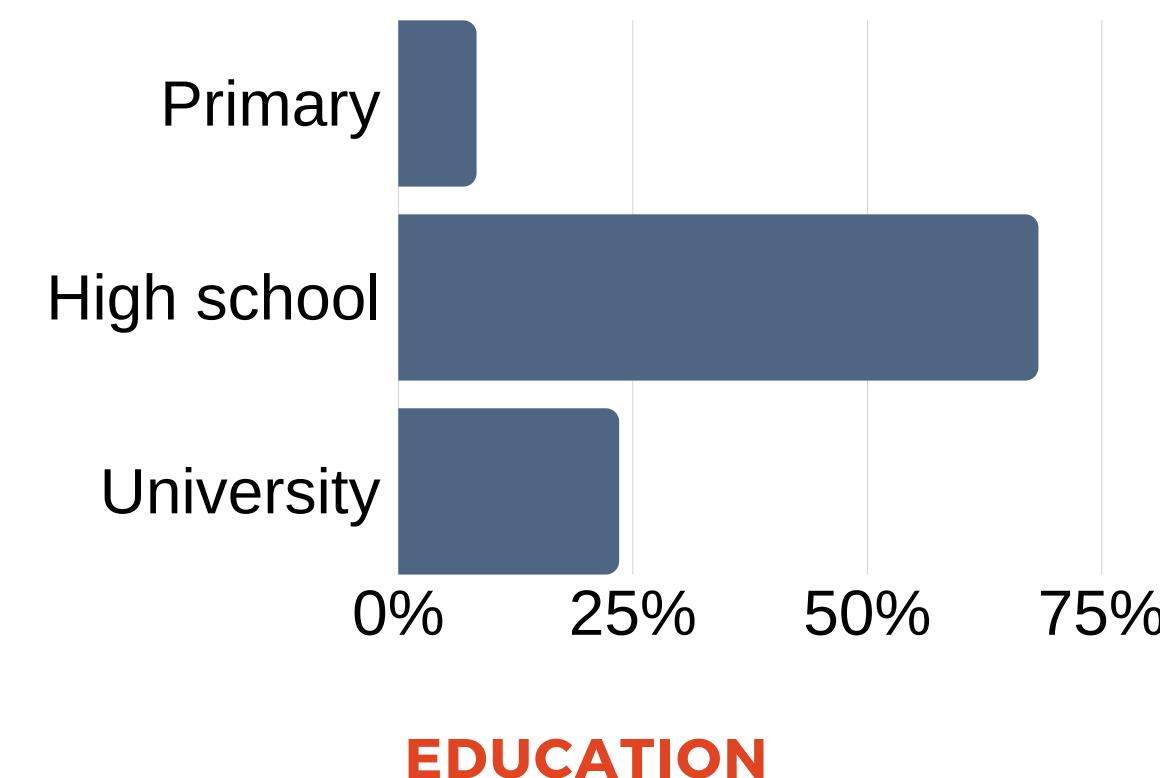

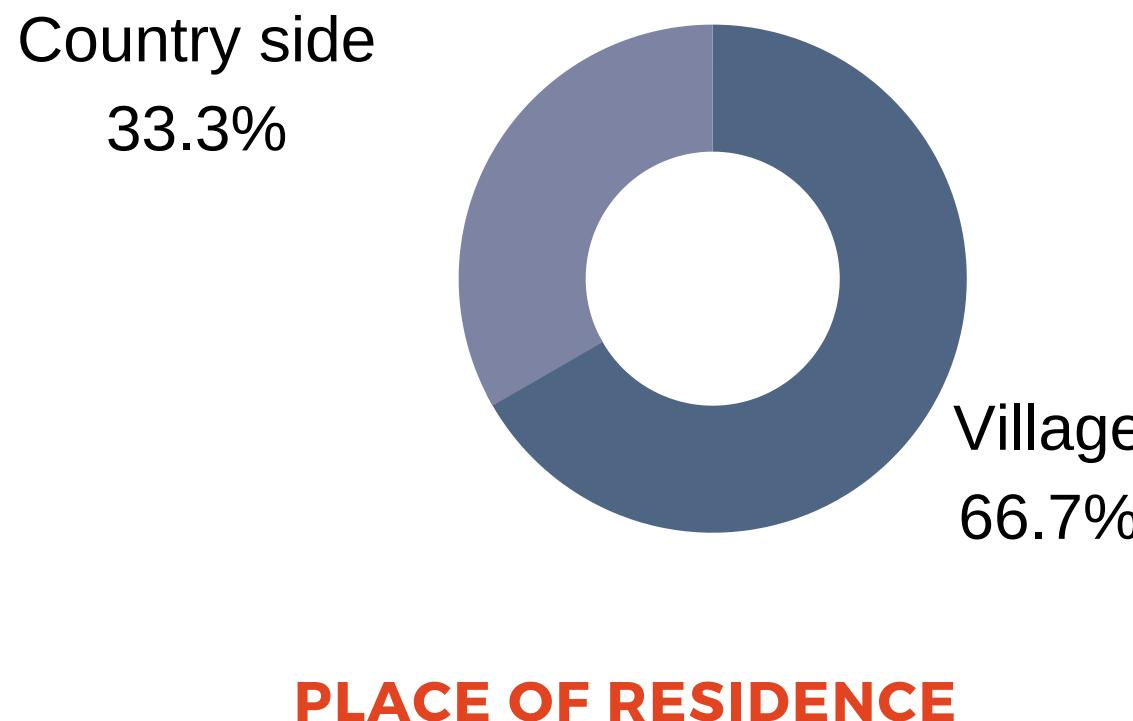

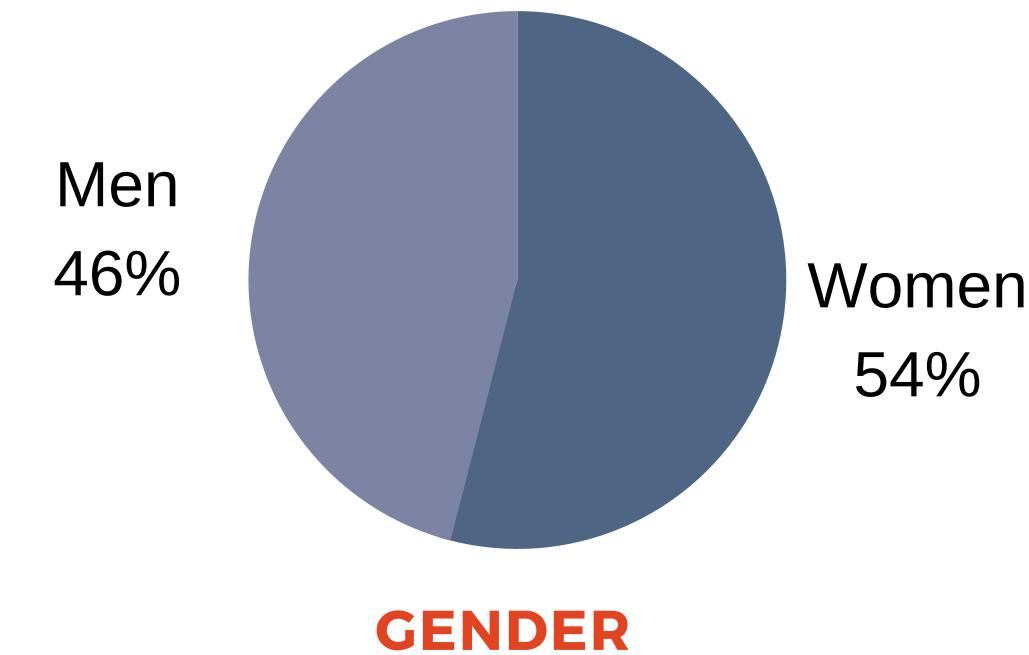

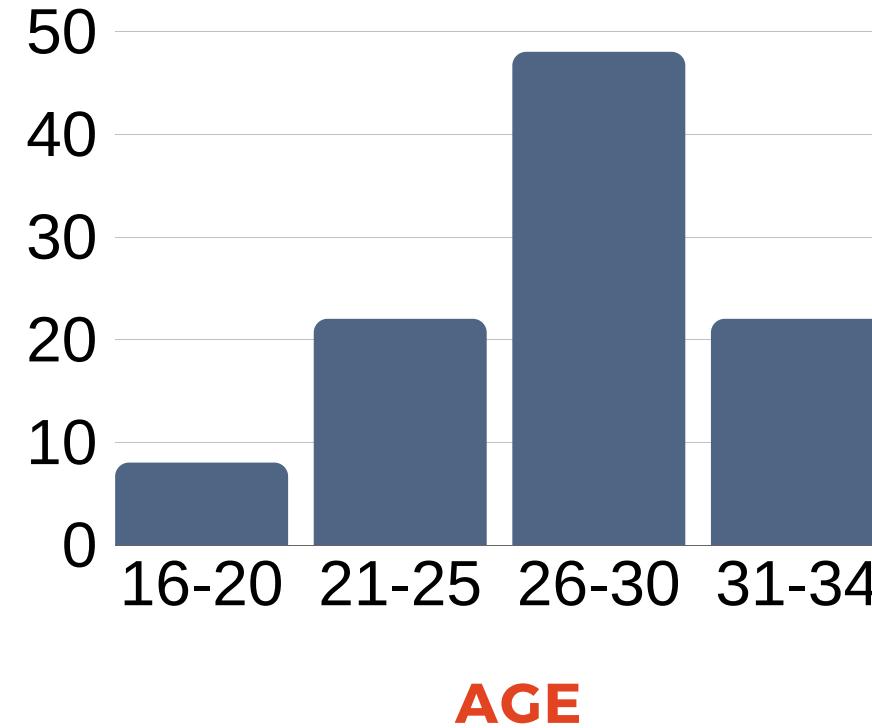

CEFE, one of the most well-established methods in entrepreneurship development and SMEs promotion worldwide, developed a global study to assess its impact on young people in rural areas as well as to make findings on the effectiveness, replicability and adaptability of CEFE transparent for the design and implementation of future programmes.

The study is based on a global survey with a sample of 459 respondents from 15 countries who all attended a CEFE training, on average 2 years ago. For extrapolation we used the Global CEFE Compass and a data bank which help us to monitor the number of Training of Trainers CEFE, courses and participants.

The results of the study show that CEFE is an effective method of promoting self-employment, business start-ups, job creation, business and income growth. In addition, its effects are largely independent of local, cultural, social or political contexts.

# PROFILE OF OUR PARTICIPANTS

(Age, gender, education, area of residence)

# CEFE IMPACT RESULTS

## EMPLOYMENT GENERATION

CEFE contributed to the reduction of unemployment rate from 40.5% before CEFE training to 8.7% after CEFE training. Additionally, CEFE also contributed to the creation of additional jobs.

## BUSINESS CREATION

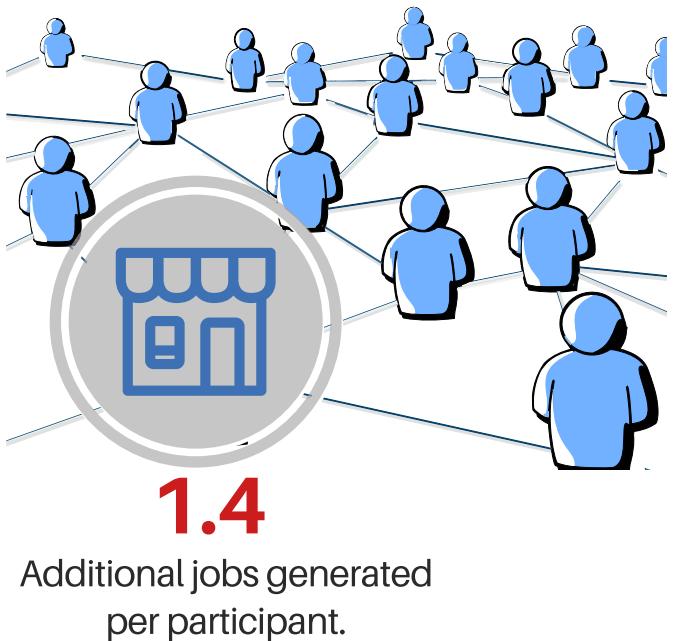

CEFE training programs fostered the creation of businesses. 44.9% of our participants started their own business after CEFE training.

**45%** **6 Million**  
Participants started up Start- ups created after CEFE Training.

## BUSINESS GROWTH

CEFE has a growth impact for start-ups and existing businesses at the same time (in terms of additional jobs created and size and income growth)

## SUPPORT TO LIVELIHOOD TO OTHERS

For CEFE participants, support to family and friends is a central social value and key factor for livelihood
